Professional Summary

Aspiring Software Developer with strong technical foundations in Python, SQL, Full Stack Web Development, and modern frontend technologies. Hands-on experience in building scalable web applications using React.js, Django, REST APIs, and relational databases. Skilled in problem-solving, debugging, API integration, database design, and responsive UI development. Passionate about creating efficient, user-centric software solutions while continuously learning modern development practices and contributing effectively in collaborative Agile environments.

Technical Skills

Programming Languages: Python, JavaScript, SQL

Frontend Technologies: React.js, HTML5, CSS3, Responsive Web Design

Backend Technologies: Django, REST API Development

Databases: MySQL, SQLite, Oracle, MongoDB

Libraries/Frameworks: Pandas, NumPy, React Hooks, Django ORM

Tools & Platforms: Git, GitHub, VS Code

Testing & Methodologies: Manual Testing, SDLC, Agile Methodologies, Debugging

Core Concepts: Data Structures, Problem Solving, CRUD Operations, Database Normalization, API Integration, System Analysis, MVT Architecture

Projects

Food Hub Web Application (React.js)

- Developed a responsive food delivery web application using React.js with reusable component-based architecture.
- Integrated APIs for dynamic restaurant listing, menu retrieval, and real-time content rendering.
- Implemented advanced React Hooks including useState and useEffect for efficient state and lifecycle management.
- Designed responsive layouts ensuring compatibility across desktops, tablets, and mobile devices.
- Added filtering and search functionalities to improve user navigation and overall experience.

Bank Account Management System (Python, MySQL)

- Built a Python-based banking application for managing customer accounts, transactions, balances, and records.
- Designed normalized MySQL schemas for efficient data storage, retrieval, and integrity maintenance.
- Implemented validation mechanisms to detect invalid operations and improve system reliability.
- Applied debugging and logical error analysis to optimize application performance.

To-Do List Application (Django)

- Developed a full-stack task management web application using Django framework.
- Implemented complete CRUD functionality using Django ORM with modular URL routing.
- Built user-friendly interfaces using HTML, CSS, and Django template inheritance.

Training & Certification

Full Stack Developer Certification

QSpiders Training Institute

- Completed intensive training in Python, Django, SQL, Web Development, and Full Stack Application Development.
- Built interactive frontend applications using React.js, JavaScript, HTML, and CSS.
- Worked on backend API integration, database connectivity, debugging, and version control workflows.

Education

B.Tech in Metallurgical and Materials Engineering

Rajiv Gandhi University of Knowledge Technologies

2021 – 2025

CGPA: 8.18

Pre-University Course

Rajiv Gandhi University of Knowledge Technologies

2019 – 2021

CGPA: 6.53

Secondary School Certification

Zilla Parishad High School

2018 – 2019

GPA: 10
